Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: ____.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: The species draws to an image forming apparatus having a plurality of the removable developing units, wherein one end of an image producing area of an image carrier of a first developing unit *coincides* with one end of an image producing area of an image carrier of a second developing unit adjoining to the first developing unit.

Species II: The species draws to an image forming apparatus having a plurality of the removable developing units, wherein an image producing area of an image carrier of a first developing unit and an image producing area of an image carrier second developing unit adjoining to the first developing unit partially *overlap* with each other.

Species III: The species draws to an image forming apparatus having an operation unit allowing to select one of different levels at which the image data is corrected for compensating for displacement and inclination of at least one of the plurality of the developing units with respect to reference one of the plurality of the developing units.

The claims are restricted because they contain mutually exclusive limitations. The first species recites the limitation “coincide” that is not found in the second and third species. Similarly, the limitations “overlap” and “an operation unit allowing to select one of different levels at which the image data is corrected for compensating for displacement and inclination of at least one of the plurality of the developing units with respect to reference one of the plurality of the developing units”, each is found either in the second species or the third species but not in both and in the first species.

Art Unit: 2853

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
